GLOSSARY
[View Full Glossary](#)

- **First Owner**
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.
- **New Owner Reported**
When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.
- **Ownership History**
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.
- **Title Issued**
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

| | |
|------------------------------|--|
| Recall date: | Not reported |
| Units potentially affected: | 34,771 |
| NHTSA campaign number: | 06V266000 |
| Defective part or component: | ENGINE AND ENGINE COOLING |
| Description: | On certain passenger vehicles, due to improper molding of the resin body of the crankshaft position sensor installed on the engine block, engine oil may penetrate the seal and enter the sensor wiring connector. The wire harness connector may not be sufficiently attached to the locking tab of the sensor wiring connector. Engine oil inside the sensor wiring connector could cause expansion due to the heat of the engine and could deform the sensor wiring connector. The connector may become disconnected, which could cause the engine to stall while driving and not be able to be restarted increasing the risk of a crash. Dealers will replace the crankshaft position sensor free of charge. The recall is expected to begin early August 2006. Owners may contact Toyota at 1-800-331-4331. |

This 2002 TOYOTA PRIUS safety recall information was provided by the Insurance Institute for Highway Safety, Highway Data Loss Institute and is derived from the [National Highway Traffic and Safety Administration](#) list of safety recalls. New Car Test Drive Review

NewCar **TestDrive**.com

| | |
|------------------|---|
| Category: | Review: |
| Summary: | Making it easy to be green. By Mike Quincy, NewCarTestDrive.com |
| Overview: | <p>Toyota offers the Prius as an environmentally friendly car for the masses. It's designed to handle the daily grind on congested roads while it delivers fuel-economy numbers that would make a diesel jealous. Unfortunately, the price for your eco-awareness is mediocre comfort, handling and performance stickered at \$20,000. The Prius is not a large car; that makes it easy to park, but you may sometimes feel threatened by aggressively driven sport-utilities.</p> <p>Until someone invents a lighter battery or a longer power cord, electric cars don't make much sense. But gasoline-electric hybrids do. A hybrid combines battery power with a highly fuel-efficient gasoline engine to achieve remarkable fuel economy.</p> <p>You never have to plug, unlike an electric car, because the gasoline engine continuously charges the batteries. The gas engine can be small, because the electric motor works with it to maximize performance. The engine shuts off at traffic lights to further save fuel and reduce emissions, earning Super Low Emission Vehicle (SULEV) certification.</p> <p>It's easy to live with a hybrid because it requires no commitment from the driver. You don't have to tell the car to switch to either the gas or electric motor; it just does it, automatically. It feels, sounds, and drives like a normal car.</p> <p>The Toyota Prius is one of just three hybrid gas-electric cars currently sold in the United States. The pseudo-sporty Honda Insight looks low and sleek, but seats only two people, while Honda's Civic Hybrid comfortably seats four.</p> |

Prius is tall and narrow and admits four people through four tall doors, while accommodating 12 cubic feet of their stuff in the trunk. It is designed not only for efficiency in how it goes, but in how much it can take there. And its efficiency is truly laudable, with an EPA rating of 52 mpg in city driving.
