

Accessing the iPod audio source in CDC mode

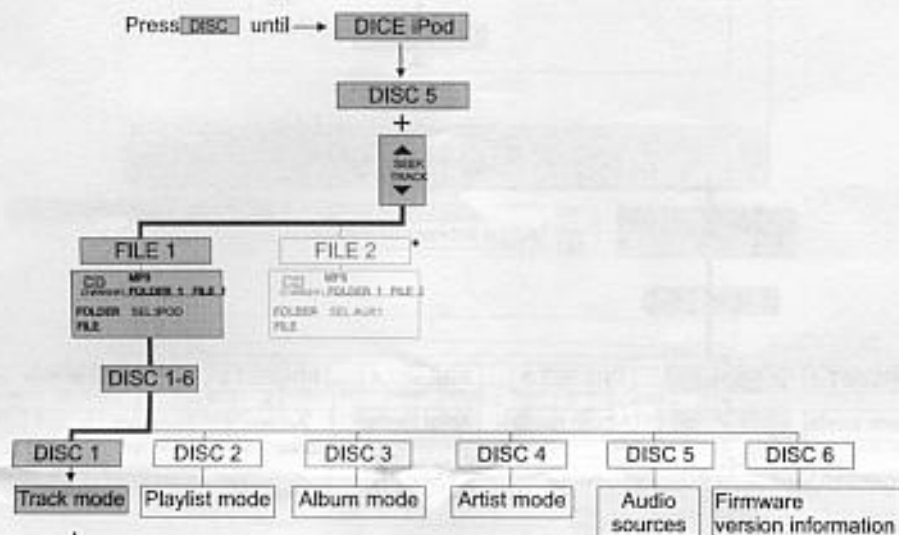

Press the DISC button to access the DICE iPod interface and its features. On some radios this button may be labeled as CDC/AUX or CDC/SAT. Pressing this button repeatedly will cycle through sources present in your vehicle. When the DICE iPod interface is active, use DISC5 TRACK 1 to select the iPod audio source.

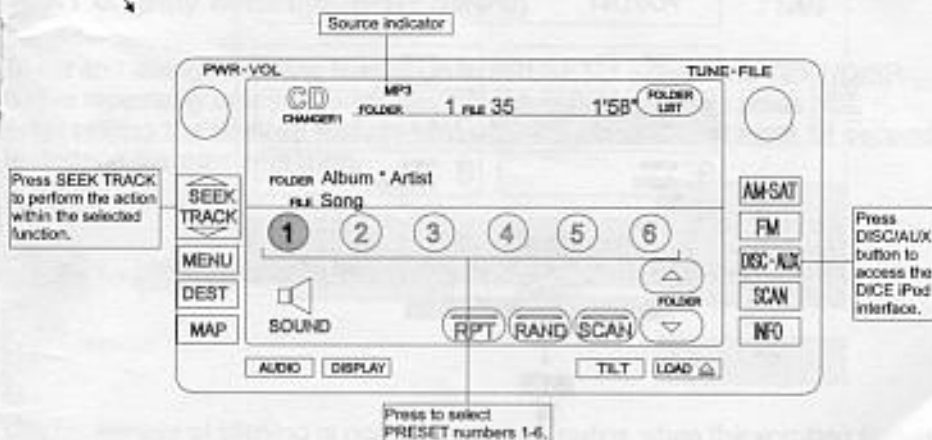

Note that the functions assigned to the buttons may differ.
 * Refer to the section titled: Using the AUX audio input.

Accessing the iPod audio source in MP3 mode

Press the DISC button to access the DICE iPod interface and its features. Note that you may have to switch to another audio source and then press DISC again to access the DICE iPod module. On some radios this button may be labeled as CDC/AUX or CDC/SAT. Pressing this button repeatedly will cycle through sources. When DICE iPod is active, use DISC 5 and then select the iPod audio source by pressing  or .

Note: Text is fixed in Track text field.

* Refer to the section titled: Using the AUX audio input.

Accessing the iPod audio source in SAT mode

Press the SAT button to access the DICE iPod interface and its features. On some radios this button may be labeled as AM/SAT or CDC/SAT. Pressing this button repeatedly will cycle through sources. When the DICE iPod interface is active, use PRESET **5** and then select iPod audio source by pressing .

Press  until →
