

■ “ECO savings” settings

The gasoline price and fuel consumption comparison settings can be set, and the screen settings can be changed between basic and detailed.

- To input the gasoline price, press the “DISP” (to increase) or “TRIP” (to reduce) switch.

When the engine switch is turned to the “ON” position (vehicles without a smart key system) or the “POWER” switch is turned to ON mode (vehicles with a smart key system) after refueling, the gasoline price input screen is automatically displayed.

- To input the fuel consumption comparison, press the “DISP” (to increase) or “TRIP” (to reduce) switch.

When the fuel consumption comparison is input, the estimated savings in fuel costs are displayed. If the fuel consumption comparison is not input, the cost of the consumed fuel will be displayed.

■ Menu screen selection

The following screen changes and settings can be performed:

- The eco savings record screen can be switched on or off.
- The 5 minute fuel consumption screen can be switched on or off.
- Past record can be reset.
- The past record screen can be switched between off, monthly average and personal best.

■ Screen off

The screen can be turned off.

The upper part of the screen is always displayed and cannot be turned off.

Trip summary display

When the hybrid system is turned off, drive information data since the system was started is displayed after the ending animation.

When the doors are locked, the screen turns off.
