

# GEORGE W. BUSH'S GASOLINE PRICE ELIXIR

## OFFSHORE OIL DRILLING

MAY SAVE PENNIES - IN JUST TWENTY YEARS • WORTH THE RISK

GEORGE W. BUSH  
•A NAME YOU CAN TRUST•

With our economy sinking and oil prices soaring, George Bush is offering snake oil: a plan to sacrifice more of our coasts to oil drilling on the chance it will produce a few weeks' worth of oil and reduce gas prices by a few pennies a gallon...in 2028. Imagine America forever tethered to Bush's failed energy policy. It's like giving him five more terms.

**It's a cruel Shell game. And BP game. And ExxonMobil game.** Over the past five years, the number of domestic drilling permits has nearly doubled. But because of rising worldwide demand, oil prices have skyrocketed. More drilling off our coasts is not the answer. Once destroyed they can never be replaced. The only winners will be the oil companies.

**Want gas at \$1 a gallon?** America needs a bold new approach to energy, from more fuel-efficient vehicles to plug-in hybrids and electric cars. A cleaner electric grid powered by renewables. Existing technologies could have us driving at the equivalent of a buck a gallon for gas!

Tell your Representative and Senators to stop the giveaway of our coasts. Tell them you won't stand for billions more for oil companies—and snake oil for the rest of us.

**MOBILIZING AMERICA**  
FOR OUR ENVIRONMENT
