- **Step 2.A in the Repair Procedure has been updated.**

May 8, 2009 Rev1:

- **Parts Information table has been updated.**
- **Warranty Information table has been updated with new models.**

Any previous printed versions of this service bulletin should be discarded.

Introduction

Some customers may experience multiple warning lights illuminated, vehicle not shifting from Park to Drive, and other accessories becoming inoperative after the vehicle has cold soaked in sub freezing (below 14°F[-10°C]) ambient air temperatures. A newly designed relay has been made available to improve this condition. Use the following procedure to address this concern.

Parts Information

PREVIOUS PART NUMBER	CURRENT PART NUMBER	PART NAME	QTY

* Essential SST.

NOTE

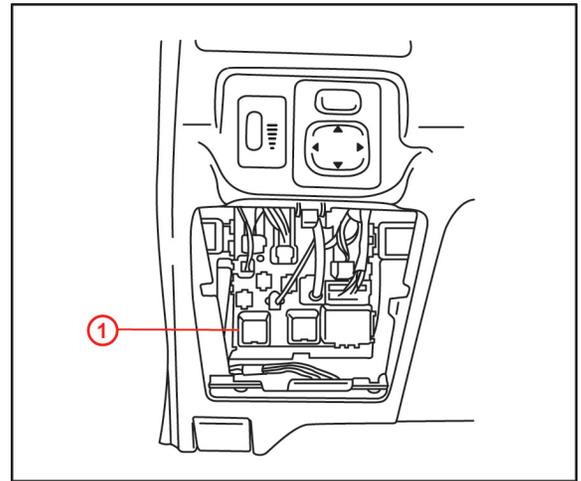

Additional TIS Techstream units may be ordered by calling Approved Dealer Equipment (ADE) at 1-800-368-6787.

IG1 Relay Freezing

Repair Procedure

1. Locate the instrument panel junction block No. 1 in the Instrument Panel (as shown in Figure 1).
2. Remove the relay and verify the part number located on the side of the relay.
 - A. If the part number is NOT 90987-02031, then replace the relay with the countermeasure relay.
 - B. If the part number is 90987-02031, then diagnose the specific conditions reported by the customer following the Repair Manual.

Figure 1.
