RELIABILITY

## Will the battery be replaceable in Hybrids or will the car lose its value/the battery very expensive to replace, a bit like an iPhone battery is very hard to replace?

It is extremely unlikely that a battery will need replacing. In the unlikely event that the hybrid battery does need to be replaced and the warranty has expired, the cost is approximately £800.

An annual Hybrid Health Check at a Toyota Dealer is the best way to ensure you are safeguarding the health of your vehicle for years to come.
