WHATS GOING ON UNDER THE HOOD

Authorized Distributor
VERSUS
AUTO GAS equipment

Autogas (LPG) Hybrid Basic Components

All gasoline equipment remains and is fully functional. Conversion components are installed beside original equipment and turn on automatically at operating temp. You lose no functionality of Gasoline but at appx 1.50 a gallon savings in fuel why not burn **Autogas**.

Welcome to Americas Autogas Systems

There is new technology that has been recently approved by the EPA that allows Authorized companies to install specialized equipment on vehicles. This is so they may use Gasoline or alternative fuels like LPG. You can choose LPG (Autogas), an inexpensive, eco friendly, high octane fuel produced domestically in the USA, or you can remain on gasoline.

WHY NOT CHOOSE BOTH.

Americas AutoGas systems installs right along side of existing OEM fuel systems and uses inexpensive Autogas as the main source of fuel while retaining all the traditional secure options and fueling locations as before. Now you have the ability to fuel up at any of our locations with safe inexpensive Autogas. Or ask us about installing your very own fueling station at your fleet center or nearby convenience store location.

We are very proud to be the exclusive American distributor of one of the worlds most advanced Hybrid Autogas upgrade systems, the VERSUS GAS- Autogas System. We Supply it all . Autogas fuel, fueling infrastructure, and tanks.

You want to be a Distributor ?

Bring your skill sets to get Garages and Installation centers involved. We provide the hands-on training to them on your behalf. We provide you with technical training and resources so we can all be successful. Distributorships are available in some areas of the US. To get your protected area please contact us.

You want to be an install center ?

Be one of the first shops in your area to promote huge fuel savings to your customers (appx. 1.50 \$ a gallon less than Gasoline) and 'Save the planet 'and increase revenue at the same time. We can also install an Autogas Dispensing systems at a local high traffic convenience store with displays of how everyone can now enjoy the cost savings . Your shop will be prominently displayed on the unit as to where they too can make their car a Hybrid. We share revenue with the store owner or an investor who helps with the installation Costs. Making money long after the conversion sale on the fuel is very important to us....Maybe even YOU.

We want to train your shop !

Its No problem, As an Authorized Americas Autogas Systems installation center you will have access to all our training resources. Please contact us for training at our facility or yours. From Under hood kits, tank installations, as well as drivability.

!!! Please note this is training of mechanics not unskilled labor. We cannot train a technician who doesn't know a wrench from an OBD scanner, but most techs do just fine.

Want to have exclusive fuel retailer rights or just share in the fuel revenue ?

Let us show you how. Self service dual hose Autogas Dispensers for Convenience store forecourts. Comes mated to Dispenser skids for quick installation or as a Dispenser only for forecourt display. Family friendly safe and familiar. Give your customers what they want. Call for details 317-641-3945

Our Mission

To train and teach the skills necessary in making your automotive repair shop profitable in the alternative energy business. Explaining the pros and cons of LPG (Autogas) vs CNG/LNG.

To provide the most advanced and dependable Technical knowledge available. We are proud suppliers of VERSUS gas system. Our research and testing has shown this to one of the best Bi-fuel conversion kits available. Its ability to not only perform to specs but the ease of calibration thanks to its self calibrating features. Some others kit require the technician to ride with a laptop to make fuel adjustments. The VERSUS gas software reads measures and adjusts injector timing as a technician would. If we didn't know better we would have to call it magic. Call us for a test drive and we will show your shop this magic as well.

Remember as fuel costs increase, demand will become stronger. As a Shop you will be installing or working on these conversions or you can watch as your competitors do. Either way it's coming.
